

NERHP Distinguished Lecture

Tuesday, May 3, 4:00 PM
LaSells Stewart Center,
Construction & Engineering Hall

The Nation's Nuclear Energy Initiatives and the Importance of Nuclear Technology Education

**A Presentation By William D. Magwood,
Director, Office of Nuclear Energy, Science
and Technology**

As the senior nuclear technology official in the United States Government, under Mr. Magwood's leadership the Office of Nuclear Energy, Science and Technology has led the Nation in a new consideration of nuclear technology as a means to address the Nation's energy needs without polluting the air, and the Nation's role in the Generation IV International Forum. The Forum, an international collective of ten leading nations and the European Union's Eurotram, is dedicated to development of next generation advanced nuclear technologies.
